PROFILE

Creative designer with three years of experience producing campaign visuals, social content and motion assets for the BBC and the Bill & Melinda Gates Foundation. Builds visual identities that stay consistent across social, digital and publication formats, and delivers them to tight deadlines while working with editorial, marketing and product teams. A Computer Science background and front-end skills (React, Next.js, Framer Motion) give a digital-first approach to design and an easy working relationship with developers. Enjoys testing new tools, including AI, to speed up production and open up new creative directions.

CORE SKILLS

- **Campaign and Digital Design:** Campaign visuals, social carousels, quote cards, infographics, editorial layout, digital and print-ready assets
- **Motion:** Short-form motion assets for social campaigns in After Effects, code-based animation with Framer Motion
- **Brand Consistency:** Visual identity systems, colour and typography, illustration language, style guides, design systems
- **Data Storytelling:** Data visualisation, dashboards, maps and charts (Flourish), turning complex data into clear visuals
- **Emerging Tools:** Gamma AI, AI-assisted design and build workflows (Claude Code); designed AI-driven products (Public Pulse, Solara)
- **Tools:** Adobe Photoshop, Illustrator, InDesign, After Effects, Figma, Canva | HTML, CSS, JavaScript, TypeScript, React, Next.js, Supabase, Git

PROFESSIONAL EXPERIENCE

Design Consultant | Bill & Melinda Gates Foundation Africa March 2026 to August 2026

- Designed the full visual identity system (colour, typography, illustration language) for Africa Month 2026 and applied it across social carousels, quote cards and motion assets.
- Created campaign visuals, infographics and data visualisations for World Immunization Week, World Malaria Day, World Health Day and other health observances, making complex public health data easy to read for African audiences.
- Ran several campaign briefs at once with different stakeholders, taking each from concept through proof and feedback rounds to publication on tight deadlines.
- Delivered bilingual (English and French) assets with a consistent look across languages and platforms.

User Experience Designer | BBC News Africa December 2024 to December 2025

- Produced high-volume, deadline-critical social and publication content for live news events including the Sudan civil war, Uganda elections, WAFCON 2024 and immigration policy coverage, working with editorial and broadcast teams serving 50+ African countries.
- Led two major projects from concept to delivery (WAFCON 2024 and Uganda Elections 2026): built the visual frameworks and design guidelines, and secured stakeholder sign-off.
- Worked within a global brand governance framework, adapting layouts to different cultural contexts and keeping quality high at volume.
- Built maps and charts for news graphics using Flourish and the BBC’s internal map-projection tool.

Graphic Design Intern | County Government of Nakuru 2023

- Designed communication and print materials for county departments within strict institutional guidelines and formal approval processes.
- Prepared files for print and digital production across departments, learning multiple formats and output specifications.

SELECTED PROJECTS

- **Solara:** UX/UI and visual systems for an AI-driven wellbeing app. Built a full design system and information architecture from research findings. Placed 3rd at the PLP hackathon and received grant funding (2024).
- **Public Pulse:** Real-time sentiment-analysis and civic-data dashboard that turns live data into clear visuals for citizens and government administrators (2023).
- **FlowSpace:** Full-stack productivity app (Next.js, Supabase, Google OAuth) with a complete UI and colour-system redesign (2026).
- **Portfolio:** Personal portfolio designed and built in Next.js with Framer Motion animation (wambirulorraine.vercel.app).

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Computer Science, Kabarak University
Graphic Design Specialization, California Institute of the Arts (CalArts), via Coursera (in progress)
Certificate in Figma (Intermediate), Media Training Ltd, 2025 | Software Engineering certificates, Power Learn Project (PLP) 2024 and Moringa School 2021
